

# **Cry for Help**

Computer Tips & Tricks for  
the novice to the advanced.

## **Free Office Software yes Free & Legal**

This month's HELP is devoted to a news item that could prove to be very beneficial for my readers.

I want to bring to your attention to the fact that there is now a real choice when it comes to your selection of computer office software. The package I am referring to is called OpenOffice and it includes word processing, drawing, spreadsheets, and presentations.

OpenOffice is compatible with all other major office suites. It is free to download from the internet and use. What this means is that it will open documents created with eg; MSWord, provide similar editing ability and allow you to re-save it again in MSWord format for sending to other people. Simply visit [www.openoffice.org](http://www.openoffice.org) to learn all about it and get your copy now.

eMail me with your suggestions for **Cry for Help** topics at;

jon@jnhsoftware.com.au

'Till next month - Good Luck.
